PROFILE

CPA with 9+ years of experience in accounting, financial reporting, tax compliance, payroll, treasury, and audit support across multiple industries. Combines hands-on finance operations expertise with ERP implementation and process improvement experience to strengthen controls, reporting accuracy, and operational efficiency.

PROFESSIONAL EXPERIENCE

Titus Global-Tech Inc

Oct 2023 - Present | Finance Specialist, ERP Project Manager

- Lead finance and ERP transformation initiatives across Accounting, Procurement, Inventory, Manufacturing, and Project Operations.
- Partner with business stakeholders to strengthen financial controls, streamline processes, and improve reporting visibility.
- Drive requirements gathering, UAT, training, and post-go-live support to ensure successful adoption of finance-related systems and processes.
- Champion process improvement initiatives that enhance operational efficiency, compliance, and data integrity.

PwC Consulting Services Philippines Co. Ltd

2020 - Sept 2023 | Finance Transformation - Senior Associate

- Delivered finance transformation and internal control engagements covering General Ledger, AP/AR, Procurement, and Compliance functions.
- Designed future-state processes, governance frameworks, and KPI structures to improve financial control and operational performance.
- Supported large-scale ERP implementations through requirements analysis, testing, training, and stakeholder management.
- Identified process inefficiencies and control gaps, resulting in actionable recommendations for automation and risk mitigation.

HP Martin Holdings Inc.

2020 | Internal Control

- Managed accounting operations, revenue monitoring, budgeting support, and financial reporting activities.
- Strengthened internal controls through process reviews, compliance assessments, and reporting enhancements.

WS and Landin Inc

2019 - 2020 | Accounting Supervisor

- Led daily accounting operations covering General Ledger, AP/AR, Treasury, Payroll, and Financial Reporting functions.
- Managed month-end and year-end close activities, including journal entries, account reconciliations, and preparation of supporting schedules.
- Ensured timely compliance with VAT, EWT, income tax, and statutory filing requirements while maintaining regulatory compliance records.
- Coordinated BIR audit engagements and LOA responses, preparing reconciliations, tax returns, and supporting documentation for examination.
- Oversaw cash management, banking transactions, supplier payments, collections monitoring, and AP/AR reconciliation activities.
- Supervised accounting personnel, delegated workloads, reviewed deliverables, and supported team development initiatives.
- Supported Microsoft Dynamics migration initiatives to improve financial visibility and operational efficiency.

SELECTED ERP PROJECT EXPERIENCE

Manufacturing ERP Implementation

- Directed ERP deployment across finance and inventory functions, enabling structured and auditable operations from zero legacy systems
- Designed end-to-end workflows covering procurement, inventory, and financial integration
- Delivered training and post-go-live stabilization to ensure adoption

Key Achievement:

- Established a fully functional ERP environment supporting controlled and scalable operations

ERP Project Manager – Logistics & Terminal Operations

- Led implementation of an ERP-based terminal operations system, digitizing container movement across gate, weighbridge, and yard operations
- Designed workflows for import/export handling with real-time tracking and system validations
- Translated manual processes into ERP transactions covering EIR, yard allocation, weighbridge, and billing
- Managed requirements, process mapping, and agile backlog across cross-functional teams

Key Achievement:

- Replaced fragmented manual workflows with a unified ERP-driven terminal system improving traceability and control

ERP Project Manager – For Manufacturing & Trading Companies

- Owned end-to-end delivery of a configuration-first ERP implementation covering system design and module rollout
- Established workflows across quotation-to-order, multi-currency transactions, invoicing, item masterlist management, and project tracking
- Defined MVP rollout and enforced “configuration over customization” to ensure scalability
- Implemented approval controls, sales funnel, and compliance-aligned documentation

Key Achievement:

- Accelerated deployment while preserving long-term system maintainability through configuration-driven design

ERP Project Manager – Digital Weighbridge System

- Led implementation of an ERP-integrated weighbridge system, digitizing inbound and outbound truck transactions
- Designed automated weight capture (gross, tare, net) with real-time validation
- Established system-driven gate processes including waybill generation and inventory tracking
- Directed UAT, training, and go-live execution

Key Achievement:

- Improved inventory accuracy and audit compliance through full digitization of weighbridge operations
